

Professional sturdy and robust laminator designed to guarantee every day high quality results with great speed (on demand up to 10 m/min)

64" ALUMINUM SHAFTS (total 4 shafts) for easy loading and unloading of the rolls

It can support big and heavy rolls with diameter up to 200 mm (8 in.) thanks to the increased distance between rollers and support shafts

Heated upper roller with preset electronic temperature regulation - standard on FAYON 1600 model (Room- 60°C) (room - 140°F)

Ideal for mounting images on panels even of large dimensions, solutions applying at the same time with a plastic film or an adhesive for single-side mounting

Intuitive set up parameters thanks to the user- friendly control panel
